

# Proximity Net Solution™

Curbside Pickup

Proxidyne

Increase sales and customer satisfaction by effectively implementing Curbside Pickup. Proximity Net notifies your associates right to their two-way radio or handheld as soon as an order is placed. This results in reduced pick times and increase fill rates. And when a customer arrives to pick up the order, immediate notify staff to deliver the goods.

## Features

- Announce the order directly your floor staff using your existing two-way radios or handhelds
- Easy integration and setup
- Customizable with tones, announcements
- Expandable with sensors including call buttons, pressure mats, motion cameras

## Benefits

### Increased Revenue

Close a sale right when the customer needs assistance.

### Reduced Pick Time

Get staff notified as soon as an online order is placed.

### Improve Staff Allocation

Increase staff effectiveness by alerting when customer enters area.

### Improve Customer Service

Help customers right when they request help.

### Reduce Wait Times

Get more staff to checkout right as they are needed
